Chemistry

Lab Notebook

36 numbered lab entries · record every experiment in order

Name: ______________________________

Class / Period: ______________________________

Teacher: ______________________________

School Year: ______________________________

IF FOUND, PLEASE RETURN TO THE ABOVE OWNER.

This notebook is a permanent scientific record. Write directly in pen, correct errors with a single strike-through and initial, and never remove pages. See the Notebook Guidelines page for full rules.

GIL-BILT

Table of Contents

Fill in as you complete each lab entry.

Notebook Guidelines

Read once, then follow for every entry all year.

1. **Write in pen.**
Pencil smudges and can be altered. If you make a mistake, draw a single line through it and initial it — never scribble it out or use white-out.

2. **Record data directly here, live.**
Never on scratch paper to copy over later. A lab notebook is a record of what actually happened, including mistakes.

3. **Date and title every entry.**
Fill in the entry date and experiment title the day you do the lab, and add it to the Table of Contents right away.

4. **Use correct units and significant figures.**
Every measurement needs a unit. Match your significant figures to the precision of the instrument you used.

5. **Follow all safety procedures.**
Wear the PPE listed on each entry's Safety box, know where the eyewash station and fire extinguisher are, and never work in the lab unsupervised.

6. **Never tear out pages.**
Even a failed or messy experiment is useful data. If an entry needs a redo, start a fresh entry rather than removing the old one.

7. **Sign and date the bottom of every entry.**
This confirms the record is complete and honest — the same standard working scientists are held to.

SAFETY SYMBOLS YOU'LL SEE ON ENTRY PAGES

FLAM	CORR	TOXIC	IRRIT	HOT	EYE
Flammable	Corrosive	Toxic	Irritant	Heat / Burn	Eye Protection

Lab Title: ____________________

PURPOSE / QUESTION

SAFETY / PPE

- ☐ Goggles
- ☐ Gloves
- ☐ Apron

MATERIALS

PROCEDURE

see handout — note any deviations below

KEY REACTION / EQUATION

DATA TABLE

label each column with variable & units

OBSERVATIONS

CALCULATIONS

% ERROR

|experimental – theoretical| ÷ theoretical × 100

________ %

CONCLUSION

Answer the purpose. State whether your data supports it, explain your percent error, and name one specific source of error and how it likely affected your results.

Recorded by (signature): ____________________ Date:______________
